CLEARED PATH
CONSULTING

INDUSTRIAL SECURITY & NISP CONSULTING

CAPABILITY STATEMENT

We Clear the Path, You Lead the Mission.

COMPANY OVERVIEW

Cleared Path Consulting gives growing defense contractors a better option than an oversized retainer and a stack of recycled templates: direct, experienced security support scoped to the actual size of your contract, from your first Facility Clearance through a mature, Superior-rated program. Founder Dan Workman spent more than 10 years at DCSA as a Special Agent and Industrial Security Rep — evaluating security programs, conducting facility assessments, and accrediting the secure spaces contractors rely on. Because he used to write the audit reports, he knows exactly what inspectors look for, where teams usually stumble, and how to fix issues before they become findings.

CORE CAPABILITIES — FULL PROGRAM LIFECYCLE

- **Facility Clearance & FOCI** — Hands on guidance for FCL sponsorship from DD Form 441 through DD 254 flow-down, producing foundational documents, FOCI risk evaluation, negotiating the right mitigation instrument with DCSA, drafting Electronic and Technology Control Plans, and training Key Management Personnel.
- **Program Standup & Sustainment** — Drafting SPPs, ITPPs, and SOPs; managing DISS, NISS, and NBIS; NISPOM responsibilities training, continuous vetting, SEAD 3 foreign travel and adverse incident reporting, mandatory briefing delivery and NDA execution, annual self-inspections, and in-person support during DCSA audits.
- **Classified Space & Physical Security** — Planning and overseeing construction of accredited Open Storage Areas and Restricted Areas, plus regular physical security assessments that catch vulnerabilities before an auditor does.
- **Insider Threat & Security Rating Strategy** — ITP maturity roadmap and insider threat case management; customized SMO threat sensitization briefings, working groups and tabletop exercises; implementation of a proprietary Security Rating Scorecard strategy that moves programs from Satisfactory toward Commendable and Superior.
- **Incident Response & Investigations** — Coordinated reporting to all required entities, leading internal investigations, drafting the security violation reports and artifacts DCSA expects, and driving corrective actions to closure.

WHY CLEARED PATH

Direct access, not a ticket queue
You work with Dan personally — no hand-offs, no account managers.

Scoped to your actual contract
Not an oversized, one-size-fits-all package. No surprise fees.

Support that respects the rules
Cleared Path can provide custom-fit support as either a W2 FSO, 1099 AFSO, or cleared consultant.
